

Assembly Instruction

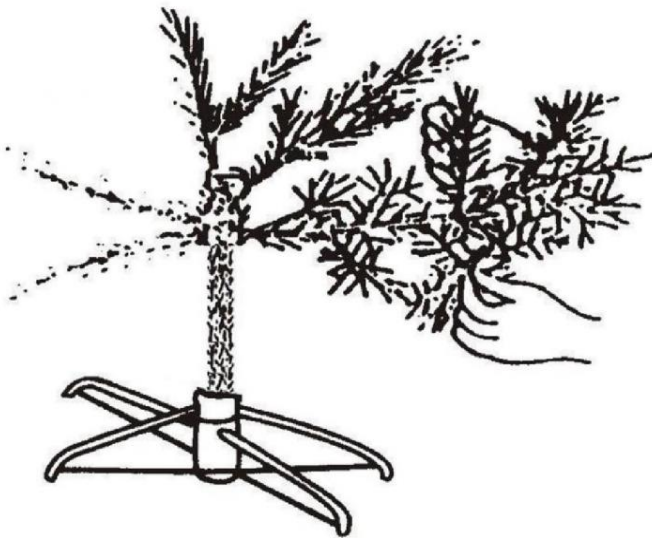

1. Install the stand.

Metal stand unfolds as “X”shaped

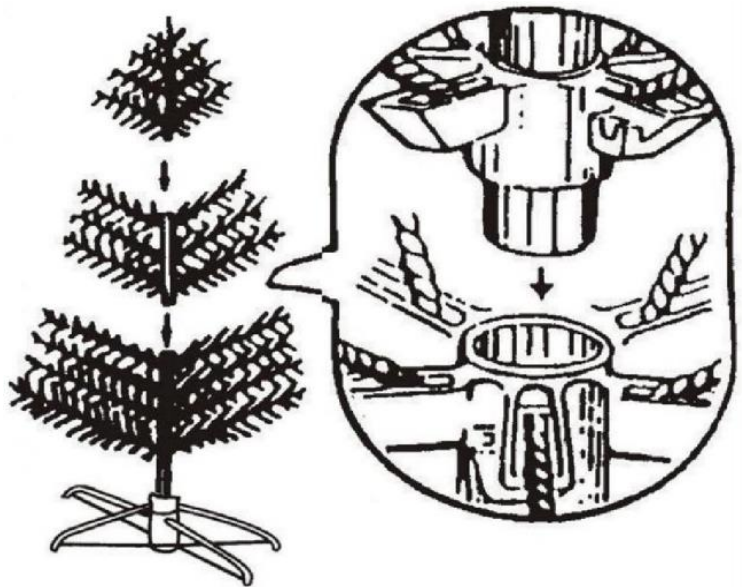

Place it on a flat surface.

2. Assemble bottom part of tree to the stand and tighten the 3 screws on the stand. The hinged branches will automatically fall down and stopped at the supporter.

3. Open the leaves of the branch and adjust them so they spread out both right and left.

4. Attach top and middle sections to the bottom section, then open the leaves like step 3.
