Solar lights – a convenient alternative to a fixed power connection and ideal light for the home and garden. Thanks to the solar panel on the SALTA outdoor light, the light from the sun can be captured and converted into electricity. They are extremely environmentally friendly, economical and equally practical, as they require neither sockets nor a connection to the mains supply. For optimum lighting, the LED outdoor light is equipped with a motion sensor that has a detection angle of 90 degrees and a range of 6-8 metres. The light duration of the sensor is around 30 seconds. Thanks to its IP44 protection rating, the 12.7 cm high wall light is protected against splashing water and is therefore suitable for outdoor use. The solar light has a light duration of 2.5 hours with a charging time of approx. 8 hours. The anthracite-coloured design can be combined in a variety of ways and ensures a modern appearance without dominating the outdoor area.
