The modern lighting elements of the TWISTER ceiling light provide decorative and atmospheric lighting. The movable elements of the luminaire allow flexible and original positioning. The remote control included in the scope of delivery dims the light and continuously adjusts the light colour of the luminaire. Alternatively, thanks to the switch dimmer, the brightness can be adjusted in three stages (25%, 50%, 100%) using a conventional light switch to create different lighting moods. The integrated memory function, which automatically restores the light scenarios set with the remote control the next time the light is switched on, perfectly rounds off the light with all its functions. The linear design in Coffee offers numerous combination options in your interiors. In addition, the luminaires feature modern LED technology, which stands for a high quality of light. LED light sources are characterized by a long service life and low heat generation.
