Your Light Rhythm - smart lighting control. The smart lighting system from Reality and WiZ creates almost unlimited lighting possibilities. Operating the app makes it possible to set up to 10 locations that can be illuminated differently. For example, rooms can be variably illuminated and lighting sequences created depending on the activities or times of day. From the RGBW colour changer to the memory function and night light, the ceiling light with starlight effect meets all requirements. The MONA ceiling light can also be dimmed as required and the light colour can be infinitely adjusted. The light therefore provides optimum lighting conditions and a pleasant atmosphere. The simple matt black colour scheme offers numerous combination options with existing interiors and colours. In addition, the luminaire features modern LED technology, which is characterised by high light quality and energy efficiency. Compared to conventional halogen lamps, up to 80% of energy costs can be saved. In addition, LED light sources have a long service life, produce less heat and protect the environment.
