The SORTLAND ceiling light has a minimalist, curved look and impresses with numerous functions. You can use the included remote control to adjust the light intensity and light colour to suit your needs. Alternatively, you can set the brightness in three levels (100%, 50%, 25%) using an integrated SWITCH dimmer with a conventional light switch. The integrated fan can be switched separately from the ceiling light in three speed settings and ensures optimally balanced room air in both summer and winter. The numerous functions of the SORTLAND are perfectly rounded off by the integrated timer, night light and memory function. The curved shape and matt black colour turn the ceiling light into a striking living element with a feel-good character. In addition, the luminaires feature modern LED technology, which stands for a high quality of light. LED light sources are characterized by a long service life and low heat generation.
