The NYBRO ceiling light has a minimalist, round look and impresses with numerous functions. The light intensity and light colour can be continuously adjusted to your needs using the remote control included. Alternatively, the brightness can be adjusted in three levels (100%, 50%, 25%) using an integrated SWITCH dimmer with a conventional light switch. The integrated fan can be switched separately from the ceiling light in three speed levels and ensures optimally balanced room air in summer and winter. The numerous functions of the NYBRO are perfectly rounded off by the integrated timer, night light and memory function. The round shape and matt white colour make the ceiling light an eye-catching living element with a feel-good character. In addition, the luminaires feature modern LED technology, which stands for a high quality of light. LED light sources are characterized by a long service life and low heat generation.
