Ceiling light AND fan! The modern FARSUND ceiling luminaire with integrated fan ensures a balancing distribution of the room air as well as optimal illumination in summer - but also in winter. With three speed levels and an integrated timer function, the fan ensures ideal air circulation. The light colour as well as the brightness of the luminaire can be continuously adjusted. The respective functions can be controlled individually via a remote control. Due to the modern design and the colour design in grey, the lamp with fabric shade can be perfectly integrated into the already existing interior. In addition, the luminaires feature modern LED technology, which stands for a high quality of light. LED light sources are characterized by a long service life and low heat generation.
