- Integreret lysdæmper
- Separat omskiftelig

The SPOCK floor lamp impresses with its simple design and timeless modernity, offering numerous application and combination options. The dimming function also allows you to adjust the light brightness as required and adapt it to your needs. This allows you to create your own individual lighting result. Ideally, the light should be positioned next to the sofa, as a flexible reading arm provides the best possible lighting result as the main light source. This can be aligned in a targeted manner so that the desired light pattern can be freely selected. The light can also be switched separately. The light harmonises in timelessly elegant matt nickel and blends easily into a variety of furnishing styles. In addition, the luminaires feature modern LED technology, which stands for a high quality of light. LED light sources are characterized by a long service life and low heat generation.
