The SPOCK floor lamp impresses with a simple design that radiates timeless modernity and offers numerous application and combination options. The dimming function also allows you to regulate the light intensity as required and adapt it to your needs. This gives you the opportunity to create your own personalised lighting result. The light is best placed next to the sofa, as a flexible reading arm as the main light source ensures optimum lighting. This can be specifically aligned to freely select the desired incidence of light. The light can also be switched separately. The light harmonises in timelessly elegant matt black and blends easily into a variety of furnishing styles. In addition, the luminaires feature modern LED technology, which stands for a high quality of light. LED light sources are characterized by a long service life and low heat generation.
