The ORSON floor lamp impresses with its timeless design and offers numerous application and design options. Ideally, the luminaire should be positioned next to a sofa or armchair, as a flexible reading arm ensures the best possible lighting result in addition to the upright as the main light source. This can be adjusted to ensure that the desired light fall can be freely selected. The ceiling washlight and reading arm can be switched separately and are infinitely dimmable. Thanks to the built-in memory function, the light starts with the last selected light setting. Thanks to the classic colour design in matt nickel and the alabaster-coloured glass, the light can be combined with many furnishing styles. In addition, the luminaires feature modern LED technology, which stands for a high quality of light. LED light sources are characterized by a long service life and low heat generation.
