The table lamp with 3D effect is not so much for targeted lighting as it is a real decorative secret weapon. The GLOBE table lamp in a globe design should be placed prominently in the interior, as it is a highlight when switched on and off. The light colour can also be adjusted using the conventional cord switch. Short switch-on and switch-off processes are used to adjust the light colour in steps of 3000, 4000 or 5000 Kelvin. The clear acrylic lamp head is mounted on a chrome-coloured base and is 20 cm high and 17.5 cm wide. The integrated LED light source emits a powerful 400 lumens or 7 watts.
