The unusual lights in the SANSA range impress with their curved design. Consisting of a continuous light element, the pendant light becomes a central element in your living area. The integrated SWITCH dimmer allows the light to be switched to three brightness levels (100%, 50% and 25%) using a conventional light switch. Even when switched off, the modern light is a sophisticated decorative element and skilfully sets the scene for your interior design. The discreet colour design in matt nickel rounds off the appearance perfectly. In addition, the luminaire features modern LED technology, which is characterised by high light quality and energy efficiency. Compared to conventional halogen lamps, up to 80% of energy costs can be saved. In addition, LED light sources have a long service life, produce less heat and protect the environment.
