Absolutely vintage: the round natural wooden suspension of the BRODY pendant light combined with black metal is an absolute eye-catcher. Centred above a table, the pendant becomes a stylish design element. The pendant light should be supplemented with a matching retro filament bulb to retain the charm of the light. The light has a length of up to 150 cm. The combination of natural wood and black metal creates a great contrast that can be individually combined. For energy-saving lighting, it is recommended to use an LED illuminant. These are an optimal alternative to conventional halogen lamps and stand for a high quality of light and energy savings of up to 80%. In addition, LED lamps help you benefit from a long service life, low heat generation and at the same time protect the environment.
