The RUSH strip light impresses with the many different ways in which it can be used. As a light accent on individual pieces of furniture or as indirect, glare-free lighting in the living room, the RUSH light strip gives the ambience a modern and cosy character. The three metre long RUSH LED strip can be shortened at the markings provided, making it ideal for personalising your living space. The LEDs can be switched to different colour modes and brightness levels using the included remote control and an RGB colour changer. Thanks to the IP44 protection class, the LED strip is protected against splashing water and can therefore be used in the bathroom or outdoors without any problems. The Stripe is kept in a plain black colour so that it blends unobtrusively into any furnishing style, especially when switched off. In addition, the luminaires feature modern LED technology, which stands for a high quality of light. LED light sources are characterized by a long service life and low heat generation.
