The NEON strip light impresses with the many different ways in which it can be used. As a light accent on individual pieces of furniture or as indirect, glare-free lighting in the living room, the NEON light strip gives the ambience a modern and cosy character. The LED strip can be shortened at the markings provided, making it ideal for personalising your living space. The RGB colour changer and the brightness of the LEDs on the three-metre-long strip can be adjusted using the included remote control. The Stripe is kept in a plain white colour so that it blends unobtrusively into any furnishing style, especially when switched off. In addition, the luminaires feature modern LED technology, which stands for a high quality of light. LED light sources are characterized by a long service life and low heat generation.
