Colour comes into play with the LEIA table lamp. A colour from the RGBW spectrum can be selected using the included remote control so that your surroundings are transformed into the desired colour. In addition, the brightness can be continuously dimmed so that it can be individually adjusted depending on the lighting conditions. The tasteful and otherwise rather discreet design is a wonderful match for modern living spaces where clear lines predominate. The table lamp has a height of 40 cm and should be placed prominently in the interior due to the colour effects. The chrome-coloured base and the crystal cover form a stylish contrast to the light colours and round off the overall picture perfectly. In addition, the luminaires feature modern LED technology, which stands for a high quality of light. LED light sources are characterized by a long service life and low heat generation.
