Water columns are absolute classics and a highlight among decorative lights! Create colourful lighting accents in your living room, bedroom or children's room. The MOTION water column is illuminated using built-in LED technology and, when switched on, creates a bubble that moves the decorative fish and decorative spheres inside. In addition, the RGB colour change creates varied lighting scenarios. The water column has a height of 130cm and a diameter of 10cm. When switched off, the water column takes on a simple appearance and can be combined in a variety of ways thanks to the titanium-coloured light base and the clear column. In addition, the luminaire features modern LED technology, which is characterised by high light quality and energy efficiency. Compared to conventional halogen lamps, up to 80% of energy costs can be saved. In addition, LED light sources have a long service life, produce less heat and protect the environment.
