Lighting and decorative highlight in one! The TORNADO LED water column uses the built-in RGB colour changer to create colourful lighting accents in your living room, bedroom, children's room or teenager's room. As soon as the column is switched on, a tornado of water appears, creating an interesting play of light and making it a real eye-catcher in your home. When switched off, the water column takes on a simple appearance and can be combined in a variety of ways thanks to its black matt base and clear column. In addition, the luminaires feature modern LED technology, which stands for a high quality of light. LED light sources are characterized by a long service life and low heat generation.
